Subject Index of Volume 66

Absorption
temperature-dependent absorption cross-sections of gaseous nitric acid and methyl nitrate, 313
Air
formation of N_2O in the photolysis/photoexcitation of NO, NO_2 and air, 291
4-Aminophthalimide
effect of β-cyclodextrin on intramolecular charge-transfer emission of 4-aminophthalimide, 185
Ampiphatic porphyrin
structural properties of Langmuir–Blodgett films containing amphipathic porphyrin and arachidic acid, 119
Anthranone
photophysical properties of anthanthrone in the presence of electron donors, 1
Arachidic acid
structural properties of Langmuir–Blodgett films containing amphipathic porphyrin and arachidic acid, 119
Azide
influence of the ionic strength on $O_2(^1\Delta_g)$ quenching by azide, 153

Bichromophoric molecules
orientational effects in intramolecular electronic energy transfer in bichromophoric molecules, 159
Bicyclo[2.2.1]heptane
fluorescence spectra and lifetimes of tropolone incorporated into the bicyclo[2.2.1]heptane frame, 33
Bimolecular cyclization
bimolecular cyclization of di-*p*-tolylamine to 2,7-dimethylacridine in the presence of bromoform: microsecond flash photolysis study, 205
Bromoform
bimolecular cyclization of di-*p*-tolylamine to 2,7-dimethylacridine in the presence of bromoform: microsecond flash photolysis study, 205

Cadmium sulphide
effects of surface conditions on the luminescence of colloidal cadmium sulfide, 379
Carbazole
static and dynamic fluorescence quenching of carbazole by tropanic alkaloids, 171
Catalysts
visible-light-assisted decomposition of H_2O and photomethanation of CO_2 over CeO_2–TiO_2 catalyst, 91
Chemiluminescence
chemiluminescence in organized molecular assemblies. Chemiluminescence of lucigenin in lyso-PAF (C_{16}), 113
Chiral aromatic esters
enantiodifferentiating photocyclodimerization of phenyl vinyl ethers and 4-methoxystyrene sensitized by chiral aromatic esters, 61
Composite catalyst
photo-oxidation of nitrogen to nitrite using a composite ZnO–Fe_2O_3 catalyst, 375
Continuous light illumination
photoreaction of pyocyanine by continuous light illumination and flash photolysis, 333
Cyanide
heterogeneous photocatalytic degradation of cyanide on TiO_2 surfaces, 367
photocatalytic oxidation of cyanide to nitrate at TiO_2 particles, 235
β-Cyclodextrin
effect of β-cyclodextrin on intramolecular charge-transfer emission of 4-aminophthalimide, 185

Decay
formation and decay of styrene–amine exciplexes, 43
Decomposition
visible-light-assisted decomposition of H_2O and photomethanation of CO_2 over CeO_2–TiO_2 catalyst, 91
3,4-Dihydroxybenzoic acid
investigation of $^1O_2$ generation by water-

soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid a photosensitizers, 345
α-Diimine complexes
investigation of $^1O_2$ generation by water-soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid as photosensitizers, 345
2,7-Dimethylacridine
bimolecular cyclization of di-*p*-tolylamine to 2,7-dimethylacridine in the presence of bromoform: microsecond flash photolysis study, 205
Di-*n*-butyl-*ortho*-phthalate
photodegradation of di-*n*-butyl-*ortho*-phthalate in aqueous solutions, 215
Di-*p*-tolylamine
bimolecular cyclization of di-*p*-tolylamine to 2,7-dimethylacridine in the presence of bromoform: microsecond flash photolysis study, 205
Dioxouranium(VI) succinate
magnetic and spin effects during dioxouranium(VI) succinate photolysis, 127

Electron donors
photophysical properties of anthanthrone in the presence of electron donors, 1
Electronic absorption
electronic absorption and fluorescence spectral characteristics and prototropic reactions of some hydroxy- and methoxy-substituted derivatives of 2-(2′-hydroxyphenyl)-benzothiazoles, 15
Excitation
comparison of 254 nm and 350 nm excitation of TiO_2 in simple photocatalytic reactors, 355
Excited state
first excited states of *p*-(*N*,*N*-dimethylamino)benzonitrile: a molecular orbital analysis, 327

Flash photolysis
photoreaction of pyocyanine by continuous light illumination and flash photolysis, 333
Fluorescence spectra
electronic absorption and fluorescence spectral characteristics and prototropic reactions of some hydroxy- and methoxy-substituted derivatives of 2-(2′-hydroxyphenyl)-benzothiazoles, 15
fluorescence spectra and lifetimes of tropolone incorporated into the bicyclo[2.2.1]heptane frame, 33
Fluorosulfate radical
photoabsorption cross-sections of $(FSO_3)_2$ and FSO_3, 141
Formation
formation and decay of styrene–amine exciplexes, 43
2,5-Furandimethanol
photocatalytic transformation of 2,5-furandimethanol in aqueous ZnO suspensions, 225

Halogenated perylenequinones
photosensitization with anticancer agents the production of singlet oxygen by halogenated and metal-ion-chelated perylenequinones, 99
Hydrogen cathode
energy conversion efficiency of photochemical cells employing a titanium dioxide film anodic membrane and a hydrogen or oxygen cathode, 253
2-(2′-Hydroxyphenyl)benzothiazole
electronic absorption and fluorescence spectral characteristics and prototropic reactions of some hydroxy- and methoxy-substituted derivatives of 2-(2′-hydroxyphenyl)-benzothiazoles, 15
Hypochlorous acid
product channels in the photolysis of HOCl, 133

Intramolecular charge transfer
effect of β-cyclodextrin on intramolecular charge-transfer emission of 4-aminophthalimide, 185
Intramolecular electronic energy transfer
orientational effects in intramolecular electronic energy transfer in bichromophoric molecules, 159

Kinetics
C_2 spectroscopy and kinetics, 263

Langmuir–Blodgett films
structural properties of Langmuir–Blodgett films containing amphipathic porphyrin and arachidic acid, 119

Laser photolysis
laser photolysis studies of photochromic processes in spirooxazines: solvent effects on photomerocyanine behavior, 79
Lucigenin
chemiluminescence in organized molecular assemblies. Chemiluminescence of lucigenin in lyso-PAF (C_{16}), 113
Luminescence
effects of surface conditions on the luminescence of colloidal cadmium sulfide, 379
Lyso-PAF (C_{16})
chemiluminescence in organized molecular assemblies. Chemiluminescence of lucigenin in lyso-PAF (C_{16}), 113

Magnetic effects
magnetic and spin effects during dioxouranium(VI) succinate photolysis, 127
Metal-ion-chelated perylenequinones
photosensitization with anticancer agents the production of singlet oxygen by halogenated and metal-ion-chelated perylenequinones, 99
4-Methoxystyrene
enantiodifferentiating photocyclodimerization of phenyl vinyl ethers and 4-methoxystyrene sensitized by chiral aromatic esters, 61
Methyl nitrate
temperature-dependent absorption cross-section of gaseous nitric acid and methyl nitrate, 313
Methylcyclohexane
selectivity of isomeric product formation in solid state photochlorination reactions of methylcyclopentane and methylcyclohexane, 193
Methylcyclopentane
selectivity of isomeric product formation in solid state photochlorination reactions of methylcyclopentane and methylcyclohexane, 193
Molecular orbital analysis
first excited states of *p*-(*N*,*N*-dimethylamino)benzonitrile: a molecular orbital analysis, 327

Nitrate
photocatalytic oxidation of cyanide to nitrate at TiO_2 particles, 235
Nitric acid
temperature-dependent absorption cross-sections of gaseous nitric acid and methyl nitrate, 313
Nitric oxide
formation of N_2O in the photolysis/photoexcitation of NO, NO_2 and air, 291
Nitrite
photo-oxidation of nitrogen to nitrite using a composite $ZnO–Fe_2O_3$ catalyst, 375
Nitrogen
photo-oxidation of nitrogen to nitrite using a composite $ZnO–Fe_2O_3$ catalyst, 375
Nitrogen[IV] oxide
formation of N_2O in the photolysis/photoexcitation of NO, NO_2 and air, 291
Nitrous oxide
formation of N_2O in the photolysis/photoexcitation of NO, NO_2 and air, 291

Oxidation
photocatalytic oxidation of cyanide to nitrate at TiO_2 particles, 235
Oxygen cathode
energy conversion efficiency of photoelectrochemical cells employing a titanium dioxide film anodic membrane and a hydrogen or oxygen cathode, 253

Palladium(II)
investigation of $^1O_2$ generation by water-soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid as photosensitizers, 345
Peroxydisulfuryl difluoride
photoabsorption cross-sections of $(FSO_3)_2$ and FSO_3, 141
Phenanthrene–olefin exciplexes
phenanthrene–olefin exciplexes. Substituent effects, 53
Phenyl vinyl esters
enantiodifferentiating photocyclodimerization of phenyl vinyl ethers and 4-methoxystyrene sensitized by chiral aromatic esters, 61
Photo-oxidation
photo-oxidation of nitrogen to nitrite

using a composite ZnO–Fe_2O_3 catalyst, 375
Photoabsorption cross-sections
photoabsorption cross-sections of $(FSO_3)_2$ and FSO_3, 141
Photocatalysis
comparison of 254 nm and 350 nm excitation of TiO_2 in simple photocatalytic reactors, 355
competitive photocatalytic reduction of H^+ and C_2H_2 by $Mo_2S_4(S_2C_2H_4)_2^{2-}$ on colloidal TiO_2, 245
heterogeneous photocatalytic degradation of cyanide on TiO_2 surfaces, 367
photocatalytic oxidation of cyanide to nitrate at TiO_2 particles, 235
photocatalytic transformation of 2,5-furandimethanol in aqueous ZnO suspensions, 225
Photochlorination
selectivity of isomeric product formation in solid state photochlorination reactions of methylcyclopentane and methylcyclohexane, 193
Photochromic processes
laser photolysis studies of photochromic processes in spirooxazines: solvent effects on photomerocyanine behavior, 79
Photocyclodimerization
enantiodifferentiating photocyclodimerization of phenyl vinyl ethers and 4-methoxystyrene sensitized by chiral aromatic esters, 61
Photodegradation
photodegradation of di-*n*-butyl-*ortho*-phthalate in aqueous solutions, 215
Photoelectrochemical cells
energy conversion efficiency of photoelectrochemical cells employing a titanium dioxide film anodic membrane and a hydrogen or oxygen cathode, 253
Photoexcitation
formation of N_2O in the photolysis/photoexcitation of NO, N_2O and air, 291
Photolysis
bimolecular cyclization of di-*p*-tolylamine to 2,7-dimethylacridine in the presence of bromoform: microsecond flash photolysis study, 205
formation of N_2O in the photolysis/photoexcitation of NO, NO_2 and air, 291
magnetic and spin effects during dioxouranium(VI) succinate photolysis, 127
product channels in the photolysis of HOCl, 133
Photomerocyanine
laser photolysis studies of photochromic processes in spirooxazines: solvent effects on photomerocyanine behavior, 79
Photomethanation
visible-light-assisted decomposition of H_2O and photomethanation of CO_2 over CeO_2–TiO_2 catalyst, 91
Photosensitization
photosensitization with anticancer agents the production of singlet oxygen by halogenated and metal-ion-chelated perylenequinones, 99
Photosensitizer
investigation of $^1O_2$ generation by water-soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid as photosensitizers, 345
Platinum(II)
investigation of $^1O_2$ generation by water-soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid as photosensitizers, 345
Prototropic reactions
electronic absorption and fluorescence spectral characteristics and prototropic reactions of some hydroxy- and methoxy-substituted derivatives of 2-(2′-hydroxyphenyl)-benzothiazoles, 15
Pyocyanine
photoreaction of pyocyanine by continuous light illumination and flash photolysis, 333
Pyrazoline
rotational relaxation of pyrazoline compounds in solution, 69
p-(*N*-*N*-dimethylamino)benzonitrile
first excited states of *p*-(*N*,*N*-dimethylamino)benzonitrile: a molecular orbital analysis, 327

Quenching
influence of the ionic strength on $O_2(^1\Delta_g)$ quenching by azide, 153

static and dynamic fluorescence quenching of carbazole by tropanic alkaloids, 171

Reduction
competitive photocatalytic reduction of H^+ and C_2H_2 by $Mo_2S_4(S_2C_2H_4)_2^{2-}$ on colloidal TiO_2, 245
Rotational relaxation
rotational relaxation of pyrazoline compounds in solution, 69

Singlet molecular oxygen
influence of the ionic strength on $O_2(^1\Delta_g)$ quenching by azide, 153
investigation of $^1O_2$ generation by water-soluble α-diimine complexes of platinum(II) and palladium(II) with 3,4-dihydroxybenzoic acid as photosensitizers, 345
Singlet oxygen
photosensitization with anticancer agents
the production of singlet oxygen by halogenated and metal-ion-chelated perylenequinones, 99
Spectroscopy
C_2 spectroscopy and kinetics, 263
Spin effects
magnetic and spin effects during dioxouranium(VI) succinate photolysis, 127
Spirooxanes
laser photolysis studies of photochromic processes in spirooxazines: solvent effects on photomerocyanine behavior, 79
Styrene–amine exciplexes
formation and decay of styrene–amine exciplexes, 43
Supramolecular structure
photochemistry of the adduct between $[Co(CN)_5H_2O]^{2-}$ and the polyammonium macrocyclic receptor [32]ane-N_8: evidence for the supramolecular structure, 337

Titanium dioxide
comparison of 254 nm and 350 nm excitation of TiO_2 in simple photocatalytic reactors, 355
competitive photocatalytic reduction of H^+ and C_2H_2 by $Mo_2S_4(S_2C_2H_4)_2^{2-}$ on colloidal TiO_2, 245
energy conversion efficiency of photoelectrochemical cells employing a titanium dioxide film anodic membrane and a hydrogen or oxygen cathode, 253
heterogeneous photocatalytic degradation of cyanide on TiO_2 surfaces, 367
photocatalytic oxidation of cyanide to nitrate at TiO_2 particles, 235
Tropanic alkaloids
static and dynamic fluorescence quenching of carbazole by tropanic alkaloids, 171
Tropolone
fluorescence spectra and lifetimes of tropolone incorporated into the bicyclo[2.2.1]heptane frame, 33
